U. S. CLINKER HOOKS

Made of wrought steel with those parts subject to extreme heat of malleable iron, tempered to withstand hard usage. Double prong on fork is rigidly fastened to wrought steel pipe, while single prong is securely fastened to steel rod which passes through pipe and is controlled by malleable grip on opposite end. A turn of the wrist closes hook around clinker which is removed with scarcely any effort. Enameled wood handle makes handling convenient and provides a cool grip.

No.	Length	Weight Per Dozen
2.....	5 feet	60 pounds
Packed 1 Dozen in Crate

MILWAUKEE MILK CANS

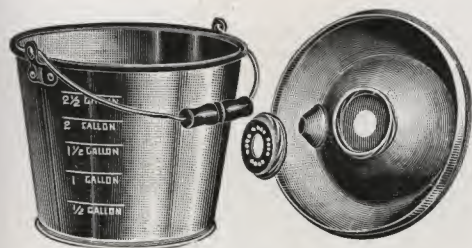

Made of special cold rolled milk-can material. Receiver and neck drawn in one piece. Breast is seamless and rim is swedged in shape of reinforcing hoop which fits tightly into swedge. After annealing, tinning and re-tinning, this is forced down over top of body. Body seam is strongly riveted. Body and bottom rest on an offset of strong inside or outside bottom hoop, and all are securely riveted together. All seams, rivets and joints are carefully floated in pure solder. All cans furnished with hollow handles.

NON-SPILL SANITARY DAIRY PAILS

Full View

Sectional View

Carefully made of heavy, charcoal quality tin plate. Strainer is very fine mesh brass strainer cloth, preventing smallest particles of dirt from entering pail. Indexed graduation is of decided value to the scientific farmer. All seams and rivets are carefully soldered, leaving no opening in which bacteria can lodge. Non-spill feature pays cost of pail in milk saved. When overturned, conical valve at top of pail immediately drops forward and tightly closes opening so no milk escapes.

DOMESTIC ELECTRIC IRON

For Voltage 110 A. C. or D. C.

Heating element hand wound, insulated in mica. Produces extra heat at point of iron, using less current.

Top is drawn steel, polished to mirror finish—triple nickel plated.

Sole plate, ground on both sides to an accurate, even ironing surface. One face perfect for heating element to rest on—the other, the ideal ironing surface.

Handle strap, extra sturdy, does not rest on iron, so ebonized handle never gets hot.

Terminal posts are locked to the steel top, rigid and immovable, so terminal connections do not break.

Plug shield stamped from high grade steel, and is of unusual strength. Detachable plug—built for real work, is held firmly—with no strain on terminal posts.

Cord is double, of finest quality and texture, six feet long. Benjamin swivel type socket lug.

Stand (not illustrated) is double deck type, nickel plated.

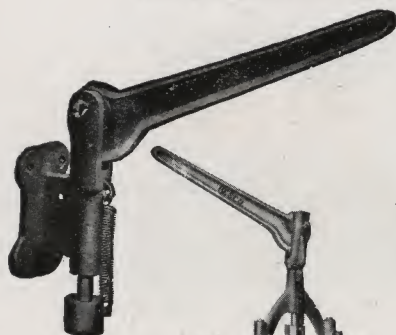

No.	Weight
6.....	6 pounds

Packed in Individual Cartons, 6 to Case

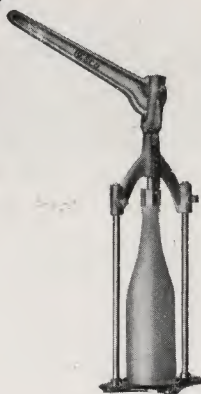

Excelsior Stove & Manufacturing Company

WASHING MACHINES

EXCELSIOR V. B. M. ELECTRIC WASHER (Very Best Made)

In our EXCELSIOR V. B. M. WASHER, new features and improvements have been incorporated, placing it in advance of any machine on the market. Simplicity of construction, with few parts, means long life and dependable service.

Type "C.C." Copper
Type "C" Galvanized

Type "A. C." Copper
Type "A" Galvanized

WASHING PRINCIPLE. The improved revolving-reversing cylinder method of washing has been thoroughly tested and results prove beyond doubt, that this method is the most efficient way to wash clothes. Every bit of every garment is washed evenly, cleanly and without danger of tearing the finest fabric. Wooden cylinder gives absolutely no wear to clothes, while metal will, as perforations leave sharp edges.

CENTRALIZED CONTROL. Particular attention has been devoted to making the machine convenient to operate. The motor, cylinder and wringer can be stopped instantly if desired. (Note location at right hand corner of machine.)

REVERSING MECHANISM. Best results in washing are obtained if cylinder reverses. With our patented reversing mechanism, we allow cylinder to come to full stop before reversing, thus eliminating continual jar to reversing gears and strain on motor. This single feature places the EXCELSIOR V. B. M. ahead of any other machine on the market. Patented safety device prevents locking of reversing mechanism.

SWINGING WRINGER. The wringer will swing over highest laundry tubs and will lock in five different positions. It is thoroughly rigid, being mounted on heavy iron brackets with double bearing, which prevents wringer from sagging. Will wring in or out with cylinder running or at rest. Wringer release breaks at center, allowing both ends of wringer rolls to release.

GUARANTEE. Guaranteed against defective workmanship or material and with proper care will last a lifetime.

SPECIFICATIONS

CYLINDER. White Maple. Smooth, easily cleaned and sanitary. Brass bolt heads on inside.

BODY. All Metal. Heavy copper or galvanized iron. Full cabinet or open type. Smooth on inside and top. No rough parts or nuts to catch on. Wrought iron legs. No wood, except cylinder and wringer. All enameled white.

MOTOR. $\frac{1}{4}$ Horse power continuous duty. 115 volts D. C. or 110 volts, 60 cycle A. C. Other types furnished at small additional cost. Ample power to operate cylinder and wringer simultaneously under full load.

WRINGER. Swings and locks in five different positions. Latest improved safety release. "POWER ELECTRIC"—11-inch rubber rolls.

MECHANISM. Neat compact design vertical driving shaft. No belts or chains to wear out or break. All moving parts are enclosed, insuring safety. Special safety knob prevents locking of machine. Cylinder reverses every six revolutions.

SPECIAL PULLEY. On motor shaft can be used to run mangle, sewing machine, ice cream freezer or other appliances.

WASHING MACHINES

NATIONAL CLOVER LEAF

OSCILLATING CABINET TYPE WASHER

A Washer designed to wash perfectly. Built to give permanent satisfaction. Will wash the finest laces or fabrics. Not a single part has been slighted either in design or production.

Has a polished copper tub, tin lined on inside. Has a brass drain faucet threaded so a hose connection can be screwed on, should this be desired.

Has a four point swinging wringer with safety release, enabling operator to wring clothes while washing. Enclosed gears starts, stops or reverses instantly by means of small lever.

Machine cut gears totally enclosed, running in oil, making a smooth running and durable machine. Direct drive, doing away with all belts, pulleys and sprockets.

Over-load clutch release in gear housing running in oil which gives ample protection for motor.

Frame is made of cast iron with cabinet bolted to same, making a sturdy frame and not depending on cabinet to carry same.

Mounted on large swivel casters, making it easy to move about.

When ordering electric machines, if direct current, always give voltage; if alternating, give voltage and cycles.

NATIONAL CLOVER LEAF

OSCILLATING OPEN TYPE WASHER

Same as cabinet type washer without cabinet, showing the interior construction of the tub. Neat and compact design of all the working parts. The Clover Leaf Oscillating Washer is built to give years of good service. Will wash anything from heavy blankets to fine lingerie.

The principle of the Clover Leaf Oscillating or Rocker type Electric Washer, is the rising and falling motion of the tub and special construction of the Clover Leaf tub from where it derives its name. The particular shape of the tub causes the water to move in a figure eight motion which gives positive agitation without the slightest chance of injury to the articles being washed.

The results will satisfy the most scrupulous housewife who prides herself on her snow-white washing.

This machine can be equipped with the cabinet at any time you should desire the same, as all necessary holes are in the frame and can be attached by any one in a very little time.

NATIONAL FOLDING BENCH ELECTRIC WASHER

Equipped with 1-6 h. p. motor of any standard make, mounted on shelf underneath tub. It is connected to gearing with belt run over shive pulleys.

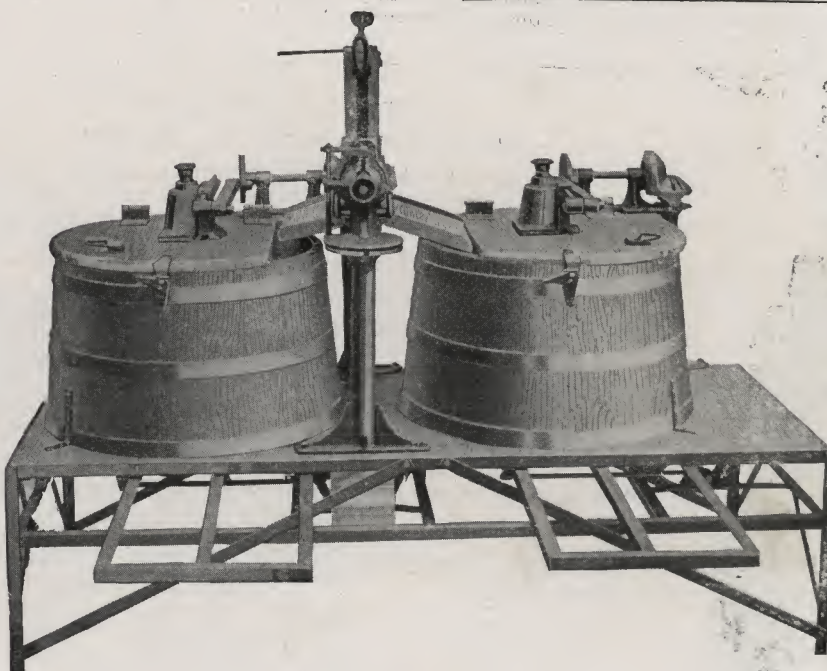

Has improved power driven wringer with safety release and reversible water board—eleven inch rolls. Swings to operate in any desired position, either backward or forward. May be stopped instantly.

Staves and bottom of tubs are made from 1 1/4 inch thick kiln-dried Louisiana Red Cypress Lumber. Dolly is mounted on square shaft which can be pushed out of way when wringing clothes from washer to rinsing tub or basket. Bottom tub drain eliminates necessity of tipping tub or machine to drain.

Heavy steel frame keeps all working parts in correct alignment. Sturdy steel folding shelf accommodates rinsing tub and clothes basket. All working parts are well guarded.

NATIONAL WATER POWER WASHERS

The National water power washer is equipped with very powerful water motor and is trouble proof. The cheapest known power is water and with this type of machine, it is used not only to cleanse the clothes but to drive the dolly as well. To operate it is necessary only to fasten the hose to the water faucet and turn on the water.

As in the balance of line, tub is made of genuine kiln-dried Louisiana Red Cypress.

ELECTRIC PRODUCTS

NO. 27 SIMPLEX RANGE

SIMPLEX ELECTRIC HOUSEHOLD RANGE

For Voltages 104 to 120 A. C. or D. C.—Two Wire or Equivalent Three

This is a new model range, without experimental features. The units are of the same type used on our heavy duty ranges, which have stood up under the most severe tests of service in army cantonments, ships' galleys and the like.

The best of materials obtainable are used throughout its construction. This, and its perfection of finish, make it a worthy addition to the finest of kitchens.

Specifications:

Three 1200-Watt, 8 inch hot plates.

Top oven unit, (radiant broiler) 2000 watts.

Bottom oven unit, 1200 watts.

All units three heats, medium heat one-half and low heat one quarter of maximum watts.

White enamel splashers and broiler pan.

EXCLUSIVE SIMPLEX FEATURES

Oven. Full size, with rounded corners and tilting bottom heating unit making it exceptionally easy to clean.

Upper heating unit is our "Two-in-one," Economy radiant broiler; high heat, full size 16x12 inches; medium heat one-half size, used for small steaks, etc. Low heat used for baking. Broiler frame is made of non-oxidizing monel metal. Multiple supports permit placing shelves at any desired height.

Hot Plates. Eight inch diameter Simplex cast iron enclosed coil type. Run red hot without damage. Highly insulated underneath giving maximum speed and efficiency.

Vertical Elevated Switch Panel: Switches in the most convenient position; food cannot spill on them. Receptacle for flatiron, toaster, etc. Note also the clear black lettering and pointers on the white enamel background.

Easy-to-get-at Fuse Cabinet: Connections from oven units enter cabinet directly. All terminals and connections simplified, open and away from heat. There are also many other convenient features such as the utensil shelf underneath and a handy rack under the oven to hold broiler pan when not in use.

Renewals. It is easy for anyone to remove, renew or examine any unit. Loosen three terminal "wing nuts" on any of the stoves and it can be lifted out. To remove the broiler or the bottom oven unit disconnect three binding post leads in the cabinet. The broiler can then be pulled out just as if it were one of the oven shelves or the bottom unit can be lifted from its hinged support and taken out.

No.	Width	Height	Depth	Size of Oven	Crated Weight

SIMPLEX ELECTRIC "SUNBOWL" RADIATOR

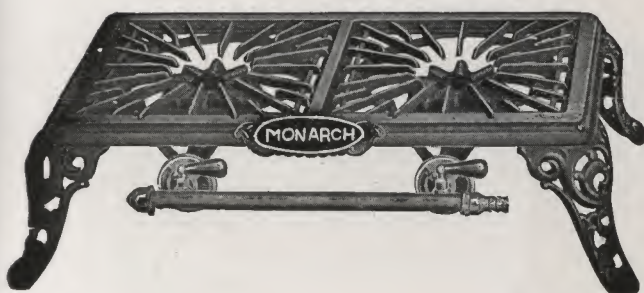

For Voltages 104-112, 113-120, A. C. or D. C.

Handsomely designed, combining in its construction finest of materials and workmanship. Throws more heat than any other radiator of its type. Inverted cone-shaped heating element easy to renew or remove. Reflector is made of solid copper—will not tarnish or rust through. Lock-on removable wire guard on Sunbowl makes reflector easy to clean. Every wire is firmly welded. Beautiful forest green finish, will harmonize with any color scheme. Furnished with 8-foot cord and detachable lamp socket plug.

No.	Diameter	Width	Weight Per Dozen
35	3½ inches	1½ inches	1½ pounds

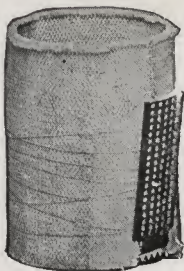

The Rockweave Wick fits all Nesco Perfect, Simmons Model A and Excelsior Oil Cook Stoves, wickless type. Carefully woven from the best long fiber asbestos obtainable, spun around a brass wire, consequently does not break off nor burn out. Reversible and easily removed for cleaning.

ASBESTOS WICK RINGS

No.	Diameter	Width	Weight Per Dozen
3	3½ inches	1 inch	½ pound

This wick is made from asbestos paper held in position by perforated screen on each side of paper. Will fit all sizes Monarch and Dangler Wickless Oil Stoves and almost all other wickless stoves.

MONARCH OIL STOVE WICKS

No.	Weight Per Dozen
5—Wick and Tube complete	1 pound
5—Wick only	½ pound

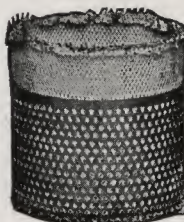

This wick and wick tube was used in all Monarch and Dangler wick oil stoves in the years 1910 and 1911. The tube consists of a tin cylinder with a brass perforated strip about ⅞ in. wide extending the entire length of the tube which engages the ratchet wheel used to raise and lower the wick.

MONARCH OIL STOVE WICKS

No.	Entire Length	Length Perforated Tube	Outside Dia. of Wick	Weight Per Dozen
04	4½ inches	3½ inches	3½ inches	4 pounds

This style wick and wick tube was used in all Monarch and Dangler oil stoves in 1912. While resembling wick used in 1913-1922 Monarch stoves it will not fit owing to size.

MONARCH OIL STOVE WICKS

No.	Entire Length	Length Perforated Tube	Outside Dia. of Wick	Weight Per Dozen
018	3½ inches	2½ inches	3½ inches	3 pounds

The accompanying cut illustrates wick and wick tube used in all Monarch wick oil stoves from 1913 to 1922. Will also fit following stoves:

Adelphia	Favorite	Household	Merit	Novelty	Quick Meal
Cameron	G & E	Ideal	Merkle's Smokeless	O. K.	Scoville
Clark Jewel	Handy	Leader	Mission	O. K. Paragon	Simmons

When same name of stove appears under different style wicks, advise name of manufacturers or jobbers from whom stove was purchased. Always use wick intended for the stove. You can do so by sending us your order and referring to above chart. By not using proper wicks both wick and burner may be ruined.

FARM AND POULTRY SUPPLIES

NATIONAL FEED COOKERS

Cooking feed for stock pays the stock raiser well in dollars and cents; and the National Feed Cooker is one of the best on the market. It is carefully made, of best quality material, and can be had in six different sizes.

Jacket is made of heavy steel, carefully constructed, and neatly painted. We put a heavy angle iron around the bottom of the jacket, instead of the flat band used by others. The angle is much better than a flat band, for the angle keeps the cooker from settling down into the earth when in use; and we call particular attention to this very important point of superiority of our cooker. The

When ordering separate jackets for feed cookers measure the kettle around the outside, about one inch from the top, where you wish jacket to fit it. Measure under the kettle flange.

handles are malleable iron, and very strong.

Kettle is made of No. 1 pig iron, guaranteed not to fire crack; and carefully tested before being shipped.

Either wood or coal can be used for fuel, separate grate for coal being furnished when so ordered; no grate is required when fuel is wood.

No.	Actual Capacity	Diameter Kettle Across Top	Depth of Kettle	Weight Complete
1.....	15 Gallons.....	24 inches.....	13½ inches.....	100 pounds
3.....	30 Gallons.....	30 inches.....	16 inches.....	175 pounds

7.....	75 Gallons.....	41 inches.....	22 inches.....	325 pounds

Packed Individually

NATIONAL BUTCHERS' STOVE

The National Butcher Stove makes a good boiler for cooking feed or heating water; can also be used for rendering lard. Furnace is made with a steel drum, which is strong and durable. Kettles are made from No. 1 pig iron, and carefully tested before being shipped. Regularly furnished for wood; coal fixtures are extra.

NATIONAL TANK HEATER

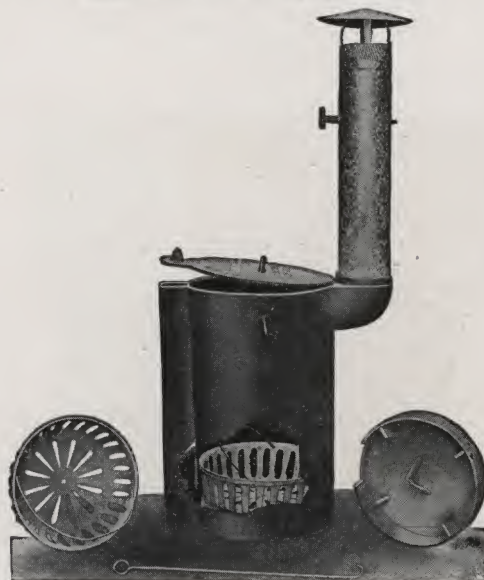

EXCELSIOR TANK HEATER

Used to prevent stock watering troughs from freezing. Made of heavy gauge galvanized steel with cast iron swing top and cast iron removable grate; the draft pipe supplies draft under the grate. Smoke pipe bolted to the top and provided with swing cover over the end, which is used as a damper and can be completely closed to keep out rain or snow. Each heater supplied with ash shovel, hook rod to remove grate, and two rods to fasten heater into tank.

No.	Diameter	Height	Body	Weight
24	14 in.	24 in.		53 pounds
30	14 in.	30 in.		55 pounds

Packed Individually

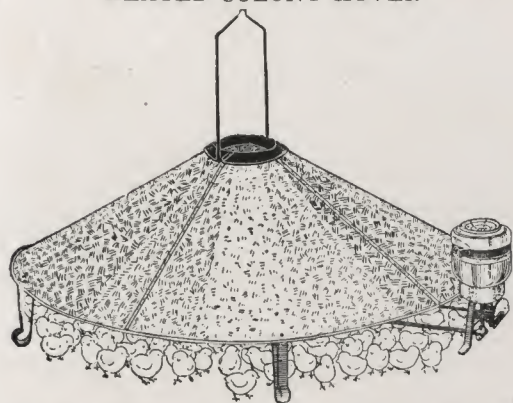

Made of one piece cast iron body, with cast grate, cast ash pan and cover, galvanized iron smoke pipe with damper and cap. Requires no fastenings in tanks. Sinks of its own weight. The cast cover swings to admit draft in the tube, and closes thoroughly tight; will hold fire perfectly. Burns chips, cobs, wood or coal. Guaranteed not to leak.

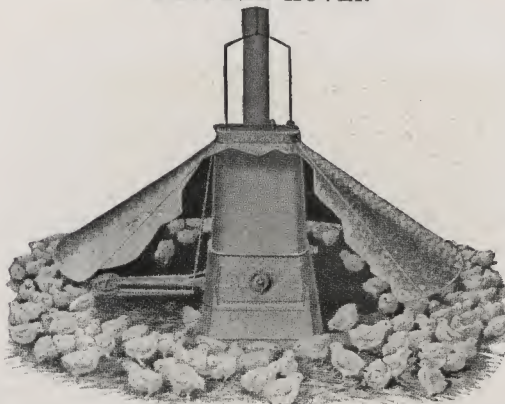

No.	Diameter	Height	Body	Weight
2	12 inches	24 inches		135 pounds

UP-TO-DATE BLUE FLAME WICKLESS OIL HEATED COLONY HOVER

UP-TO-DATE COAL BURNING BROODER HOVER

The canopies are made of galvanized steel with 3-16 inch rod at edge. Assembled complete. Has cast iron ventilator collar at top with bail to raise and lower for cleaning. The blue flame heater has no valves and is so arranged that the size of flame never changes when once set by its constant oil level. Has asbestos wire woven lighter ring. The most up-to-date blue flame wickless oil operated hover on the market.

Stove is made entirely of cast iron, gently sloping from rocker grate to top. Coal always feeds down and cannot clog. Canopy is made of 26 gauge galvanized steel with raising and lowering bail, also rope and pulley for raising from stove for cleaning floor.

SPEE-DEE CLEANSER

A cleaning preparation that cleans anything. Removes grease and dirt from your hands without water, also cleans seat covers, carpets, rugs, clothing, painted walls, woodwork, window shades, enameled ware, woollens, lace curtains, etc. Absolutely harmless, contains nothing that will injure anything that water will not injure.

No.	Size Can	Weight Per Dozen
27	1 Quart	22 pounds

Packed 3 Dozen to Case

Excelsior Stove & Manufacturing Company

MISCELLANEOUS ITEMS

GOLD BRONZE POWDER

Made from selected material, fine and brilliant. Floating properties perfect. Palegold is regular shade of gold or brass color.

No.	Shade	Size Can	Weight Per Dozen
1	Palegold	1 Pound	14 pounds
2	Richgold	1 Pound	14 pounds
Packed 1 Dozen in Case			

ALUMINUM BRONZE POWDER

Guaranteed chemically pure. Will not tarnish or grow dull and dark. Will cover more surface than anything which can be used as an adulterant.

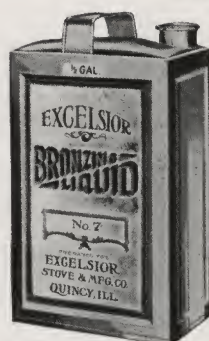

No.	Size Can	Weight Per Dozen
4	1 Pound	15 pounds
Packed 1 Dozen in Case		

VERNIS-MARTIN BRONZE POWDER

The ideal finish for furniture. Made from selected material with perfect floating properties. As easily applied as a common gold paint.

No.	Size Can	Weight Per Dozen
3	1 Pound	14 pounds
Packed 1 Dozen in Case		

BRONZING LIQUID

Can be successfully used with all grades of bronze powder. Will bring out brilliance of any bronze and produce a rich lasting finish. Mixes one quart to pound of gold or vernis martin bronze powder; ½ gallon to pound of aluminum powder.

No.	Size Can	In Case	Weight Per Case
5	1 Pint	2 Dozen	35 pounds
6	1 Quart	2 Dozen	70 pounds
7	½ Gallon	½ Dozen	30 pounds
Packed in Wood Cases			

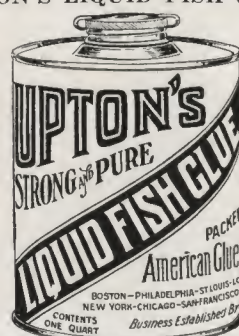

EXCELSIOR SPAR VARNISH

Strictly a first-class all purpose varnish, which dries dust free in from five to six hours. May be successfully used on automobiles, furniture, front doors, boats, refrigerators, buggies, wagons, floors, agricultural implements, in fact anywhere high grade work is desired.

No.	Size Can	In Case	Weight Per Case
1	1 Pint	2 Dozen	35 pounds
2	1 Quart	1 Dozen	32 pounds
3	½ Gallon	1 Dozen	59 pounds
4	1 Gallon	½ Dozen	57 pounds
Packed in Wood Cases			

UPTON'S LIQUID FISH GLUE

A convenient, practical adhesive for mending broken glass, china, wood, leather, paper, etc. Repairs are strong and permanent. Both economical and clean. Simple, quick and durable.

No.	Size Can	In Case	Weight Per Case
1	½ Pint	2 Dozen	21 pounds
2	1 Pint	1 Dozen	18 pounds
3	1 Quart	1 Dozen	37 pounds
Packed in Wood Cases

MAJESTIC COAL CHUTES

NATIONALLY ADVERTISED

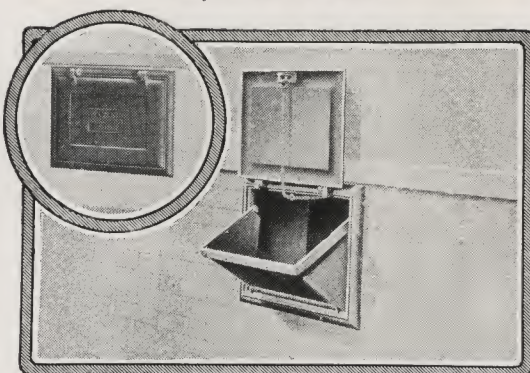

USED EVERYWHERE

No. 10 and 20

The Nos. 10 and 20, A styles, are more than coal chutes—they are windows as well. The doors are fitted with $\frac{1}{4}$ -inch wire glass panels protected by a steel shield when open. When closed the shield lies flat on the bottom, allowing the daylight to shine into the coal bin, lighting the basement.

No.	Style	Description	Wall Opening			Shipping Weight
			Wide	High	Deep	
10	A	Glass Panel—Hopper	24 in.	17 in.	13 in.	85 pounds
20	A	Glass Panel—Hopper	33 in.	22 in.	18 in.	160 pounds

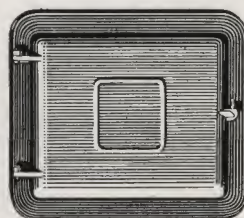

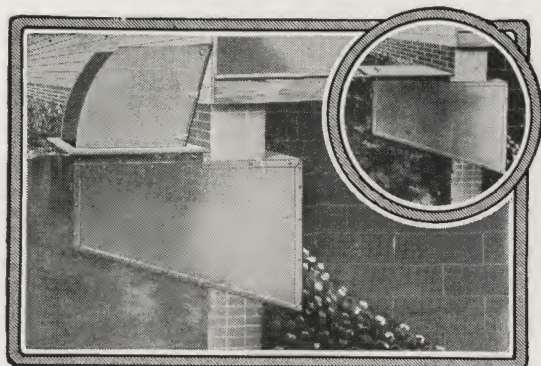

No. 101 and 203

The Nos. 101 and 203 Majestic Chutes have solid cast doors. No provision is made for changing over to a glass or steel panel. Otherwise their construction in the respective sizes conforms to the Nos. 10 and 20.

No.	Style	Description	Wall Opening			Shipping Weight
			Wide	High	Deep	
101	B	Cast Panel—Hopper	24 in.	17 in.	13 in.	80 pounds
203	B	Cast Panel—Hopper	33 in.	22 in.	18 in.	150 pounds

GRADE LINE CHUTE

MAJESTIC ASH PIT OR FLUE CLEAN OUT DOORS

Size	Weight Each
8x 8 in.	8 pounds
8x10 in.	9 pounds
10x12 in.	16 pounds

The Majestic Grade Line Chutes are designed for homes or stores with little or no foundation above the ground. The door when raised forms part of the hopper and becomes the shield which protects the building. This chute, like all Majestics, locks automatically and can only be unlocked from the inside.

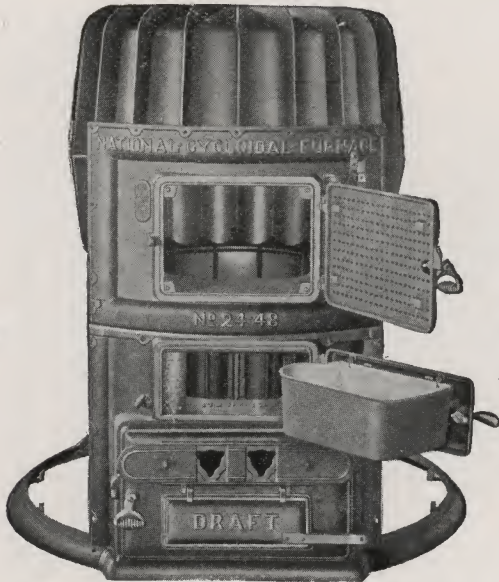

No.	Door Size	Wall Opening			Weight
		Wide	High	Length	
16	18x24	25 in.	24 in.	36 in.	190 pounds
18	24x30	31 in.	31 in.	42 in.	290 pounds

MAJESTIC CELLAR WALL GRATES

Size	Weight Each
4x 8 in.	2½ pounds
6x 8 in.	3½ pounds
6x12 in.	5 pounds
8x 8 in.	4½ pounds
8x12 in.	8 pounds
8x16 in.	10 pounds
10x12 in.	10½ pounds
10x16 in.	16 pounds
